WHO I AM

01

I AM A THIRD YEAR STUDENT AT THE UNIVERSITY OF MIAMI STUDYING COMPUTER SCIENCE AND INTERACTIVE MEDIA. I HAVE WORN MANY HATS - FROM UX/UI DESIGNER, DEVELOPER, GRAPHIC DESIGNER, PROJECT MANAGER, ALL THE WAY TO CONSULTANT, I HAVE DIPPED MY FEET IN MANY REALMS OF THE TECHNOLOGY WORLD, AND I AM ALWAYS EAGER TO TRY OUT MORE.

MY PROFESSIONAL EXPERIENCES HAVE RANGED VARIED: I HAVE BEEN A UX/UI DESIGNER FOR THE VIRTUAL EXPERIENCE SIMULATION LAB FOR TWO YEARS, WHERE I DEVELOP USER INTERFACES FOR VR AND AR PROGRAMS. I ALSO HAVE WORKED AS A WEB PROJECT MANAGEMENT INTERN FOR ICVM HAWK, A DIGITAL MEDIA COMPANY, WHERE I WORKED ON A NUMBER OF WEBSITES WITH VARIOUS CLIENTS. I ALSO SPENT TIME AS A WEB DESIGNER AT A CONSULTANCY, ORANGE UMBRELLA, WHERE I BROUGHT CLIENT'S CREATIVE VISIONS TO LIFE.

WEB DESIGN

Proficient in HTML, CSS, and JavaScript. Familiar with web development tools such as WebFlow, Wordpress, and other platforms. Familiar with SEO strategy.

GRAPHIC DESIGN

Proficient using Adobe InDesign, Adobe Photoshop, Adobe Illustrator and other Adobe Suite programs.

UX/UI DESIGN

Proficient using Figma and Sketch to create usermaps, wireframes, prototypes and final working mockups.

UX/UI RESEARCH

Experience surveying and collecting user data to make informed design decisions.

DEVELOPMENT

Proficient in using languages such as Java, Python and c# to create functional programs.

DATA VISUALIZATION

Experience using data visualization softwares to construct informative data visualizations and create a story from data.

PROJECT MANAGEMENT

Experience constructing and following timelines, utilizing project management softwares such as Asana, Clickup, and Trello.

OTHER SKILLS

- Advanced writing skills
- Advanced oral communication skills
- Information Architecture
- 3D Modeling and Printing
- Basic Physical Programming with Adafruit

PERSONAL SKILLS

LOREM IPSUM DOLOR SIT AMET, CONSECTETUR
ADIPISCING ELIT, SED DO EIUSMOD TEMPOR
INCIDIDUNT UT LABORE ET DOLORE MAGNA ALIQUA.

Blue Striped Grunt

Scientific Name: *Haemulon Sciurus*

Size: Up to 18 inches

Food Source: Smaller fish and crustaceans

Behavior Type: Nocturnal

Ocean Zone: In shallow waters near reef

Fun Fact: The Blue Striped Grunt gets its name from the grunting noise it makes when stressed. The fish grinds its teeth together!

IUCN Red List Status: Least Concern

LC

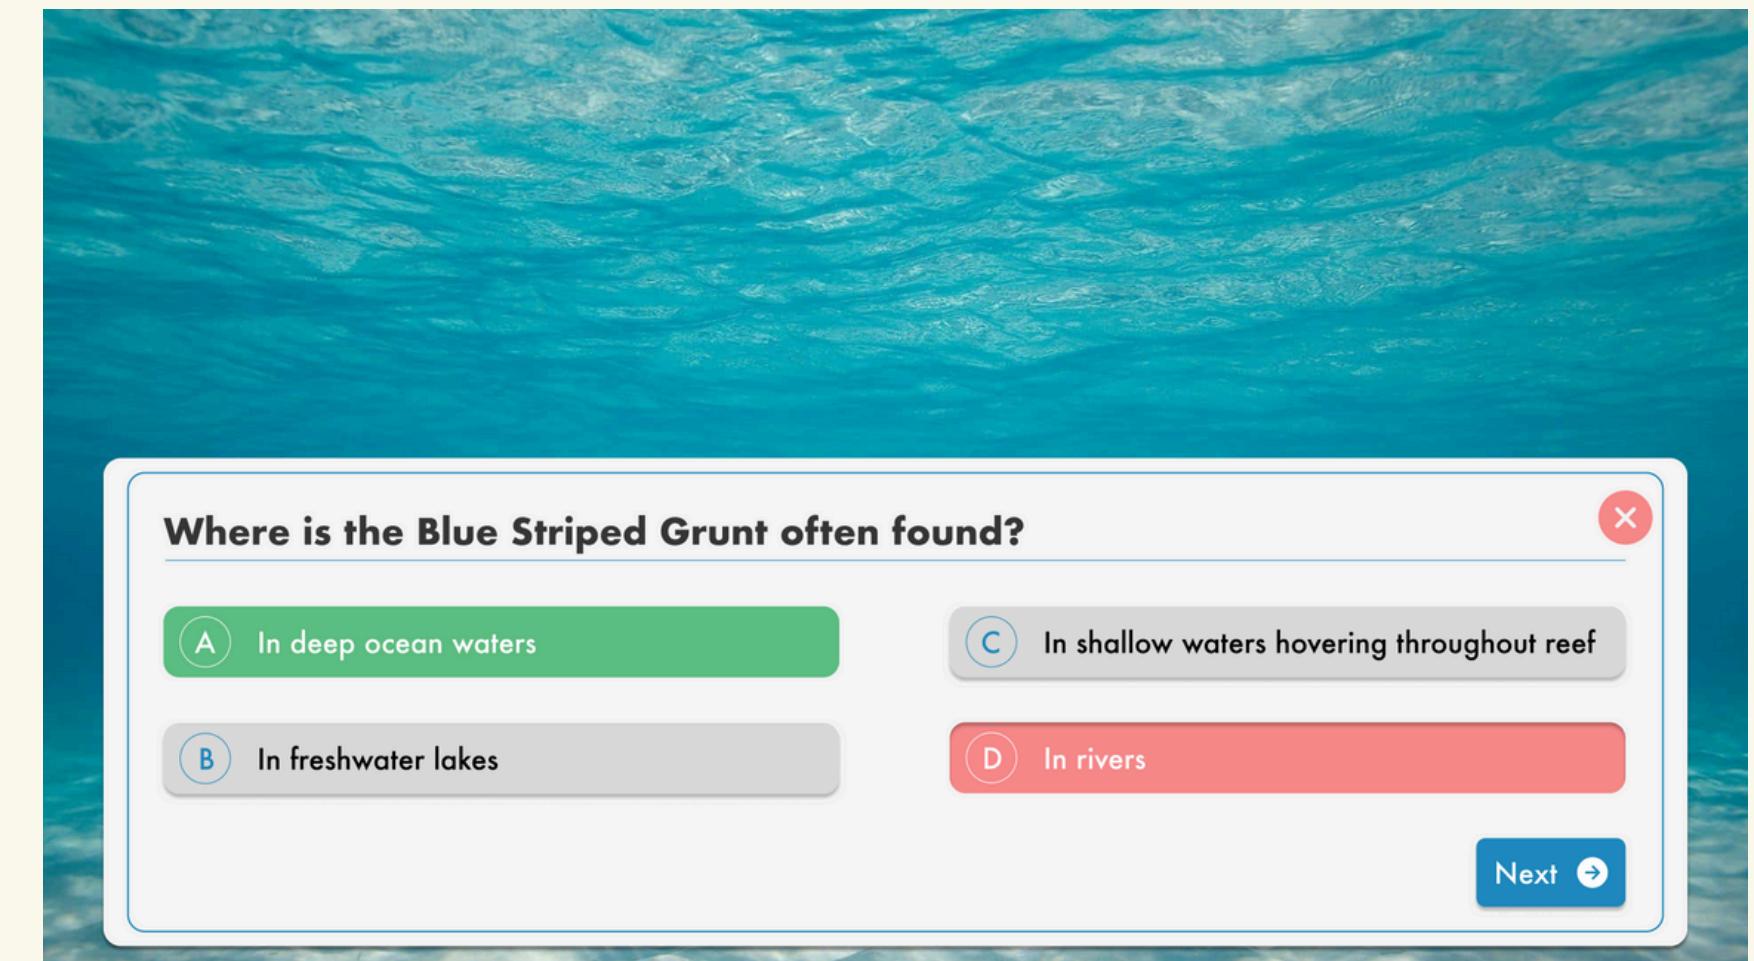

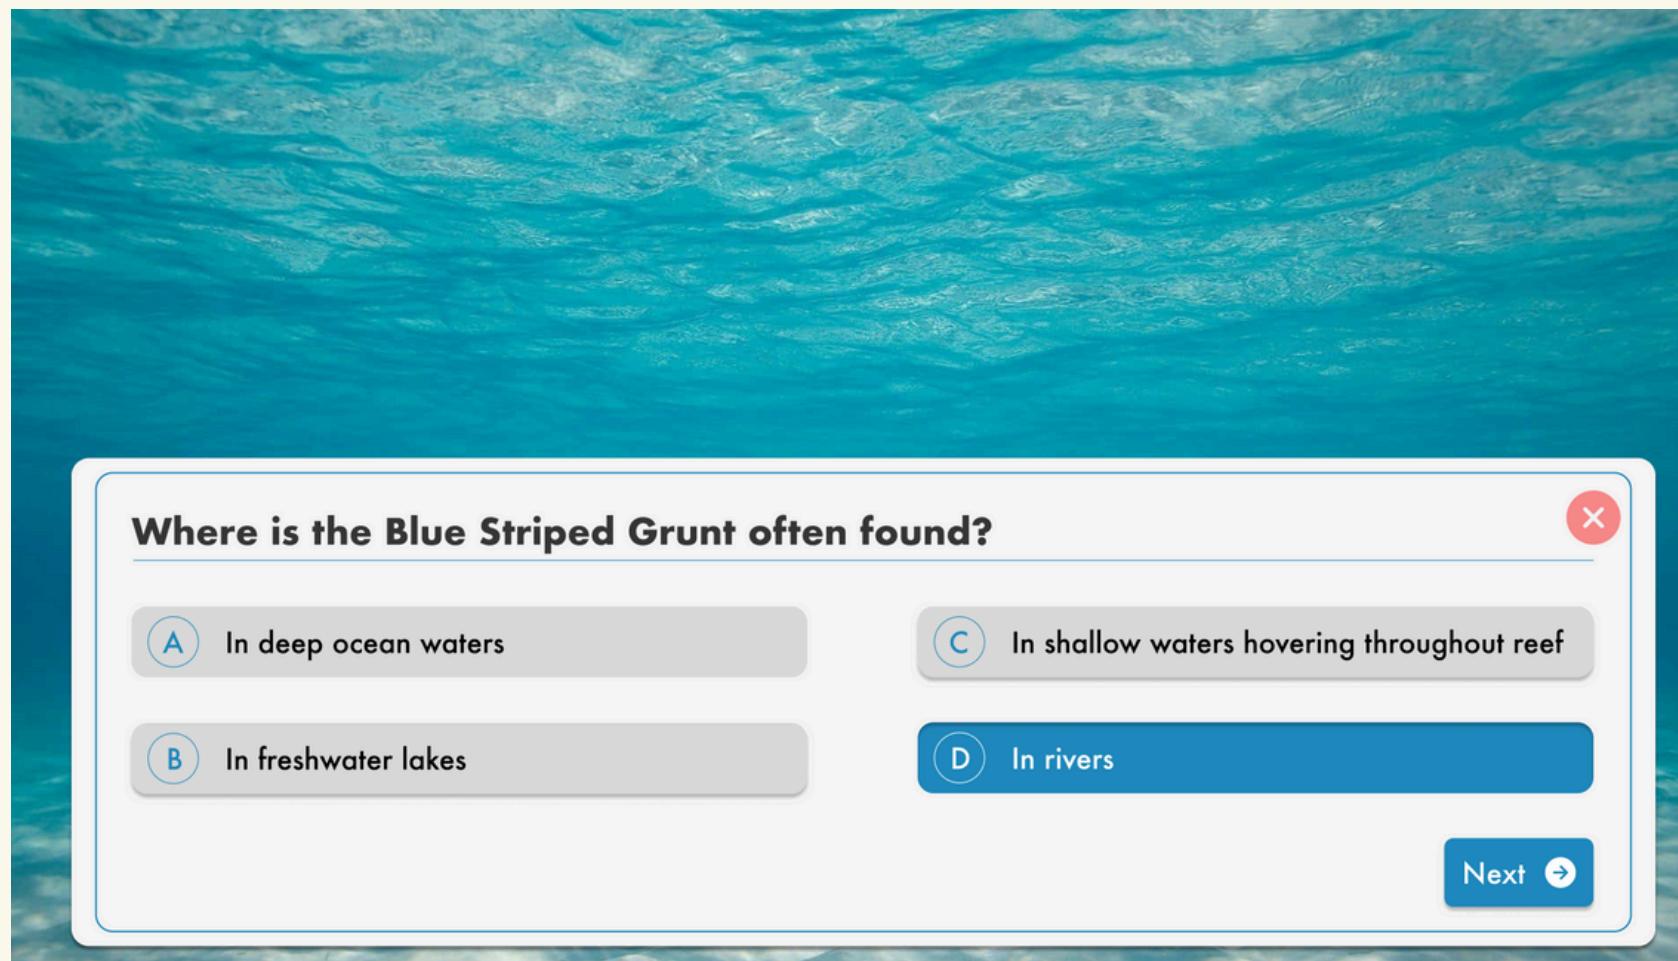

A horizontal bar with a gradient from green on the left to dark red on the right. A small green circle with the letters "LC" is positioned on the left side of the bar, indicating the IUCN Red List status for the Blue Striped Grunt.

Crystal Healing

In turbulent times, many of us harness ways to feel grounded, to calm anxiety and soothe stress, so it's not surprising that alternative therapies like crystal healing have come to the fore. The concept of using crystals to heal has been around for centuries but, with celebrities such as Victoria Beckham and Miranda Kerr speaking publicly about their belief in the practice, it's had a more mainstream resurgence in recent years. And, as with most trends reentering the zeitgeist, social media has played a huge part in its popularity - in more ways than one.

"What I have seen these last few years especially is this deeper need to connect," says crystal healer Emma Lucy Knowles. "I really feel the rise of social media has helped more people rediscover a sense of community as well as

a sense of confidence in who they are. But on the other hand, we have become reliant on that fix, that energy hit from a small computer in our hand that never really fulfills us fully with that nourishing connection that the heart, soul and mind need. So, we seek deeper and scroll further searching in the wrong spaces."

Cue mother nature "and her abundance of goodies" - from plant power to crystal vibrations - presenting deeper-rooted connections. "Crystals allow us, quite effortlessly, to move fresh energy into the being, offering internal connectivity that enhances your external connectivity," Knowles says. "More and more people are tuning into how that energy can be beneficial."

But how does it all work? We spoke to Knowles and other experts in the field to find out everything a beginner needs to know...

Judy Hall, in her work, *The Little Book of Crystals*, writes that crystals are said to "have a stable and unchanging energy pattern, each with a unique frequency and energy field, or resonance" that gives them special properties. As a result, "they act like tuning forks," helping bring "harmony" to the "very unstable energy field of the human body".

Put simply, crystal healing involves using gemstones to bring balance to an individual's life and mind.

The proposed healing benefits of crystals predominantly surround areas of mental wellbeing; including feelings of increased tranquility, positivity and focus, as well as enhanced immunity and natural pain relief.

If you want to start at home, simply choose an individual crystal and then set your intention. In a meditative-like state, hold the crystal in your hand and then focus on your goal, silently repeating a mantra, such as "please help me see my soul purpose" if you are looking to overcome self-doubt.

Knowles feels that, while you can't really make a mistake with crystals, and that "just having them in your pocket, on your desk or in your bathroom brings in a hub of energy", you need to be sure to give them something to do.

"Give the crystal a job or purpose so you can correlate that more with a 'result'."

"Equally, we have to remember that crystals work with us all so uniquely, so get curious and explore them and, most importantly, have fun in your crystal adventures rather than using them as another tool of self sabotage."

CRYSTALIZED:

Examining the roots of the crystal takeover.

At a time when wellness is at the forefront of many people's minds, crystal, rock crystal and gemstone jewelry has been experiencing a renaissance. And several jewelry designers and makers say they are seeing the results.

"I don't sell jewelry, I sell energy," Jacque Aiche, fine jewelry designer, says, "and there's this evolution of people searching for something they can connect to and feel better."

Examples of rock crystal jewelry can be traced as far back as the Sumerian and Mesopotamian civilizations.

"Pre-Columbian Indigenous people in the Americas were using nuts and beads with the same sort of mind-sets, that certain things could help protect you,"

said Sara Payne Thomeier, Head of Jewels for the Americas at Phillips auction house.

Not only is there now increased interest and awareness of the potential remedial properties of natural earth elements like crystals, but "it's more normalized and mainstream," Ms.

Thomeier said. "I think back a few years ago; those who alluded to healing powers were perceived as a bit hippy-dippy and were bashful to mention it. It's not embarrassing anymore to present the idea and show you have some faith in the possibility that these things can have healing powers.

"There's no question within the category of gemstones, minerals, crystals and rock crystals, there has been a huge, huge increase in interest," Ms. Selva of Fred Leighton said. Case in point: While on the phone, Ms. Selva walked into her chief executive's office only to discover a newly installed giant amethyst geode.

MANIFEST
a guide to actualizing your desires

11 SETTING INTENTIONS

Learning how to manifest something starts with getting clear—crystal clear—on your goals and intentions. Determine how to achieve your goals. What is it exactly that you want? In what specific ways do you want your life to change or improve? Think of what actions you may need to accomplish this and how the success will be measured. Manifestation relies heavily on the intent with which you manifest.

22 PROCLAIM

Once you're clear on your goal(s), put them out there. Own them, proclaim them, and ask the universe to fulfill them while believing they will be. Engage your motor cortex by connecting with your higher vibrational energy through visualization and repetition. Whether you want to manifest love,

Use these intentions as a guide for your manifestations. Ensure that you keep in mind important aspects of the goal you are trying to manifest into reality: including the timeframe you wish to see it achieved, how it aligns with other goals, and what you can do presently to make it more achievable. With these clear intentions created, a strong foundation is set for your manifestation.

words: Vanessa Leikvoll

33 TAKE ACTION

What small steps can you begin taking each day to work towards your goals? How can the principles behind knowing how to manifest something integrate into your routine? It's not enough to merely think and want something. You have to apply action to it and believe that it will happen.

If you want a leadership position, for example, apply the methods above to set

44 MINDFULNESS & GRATITUDE

A study at Berkeley made an interesting discovery regarding the concept of gratitude. Among the 300 people who participated, the study found higher levels of improved mental health and outcomes amongst those who wrote gratitude letters versus those who didn't.

Learning how to manifest something also means practicing gratitude for

55 AVOID SELF-DOUBT

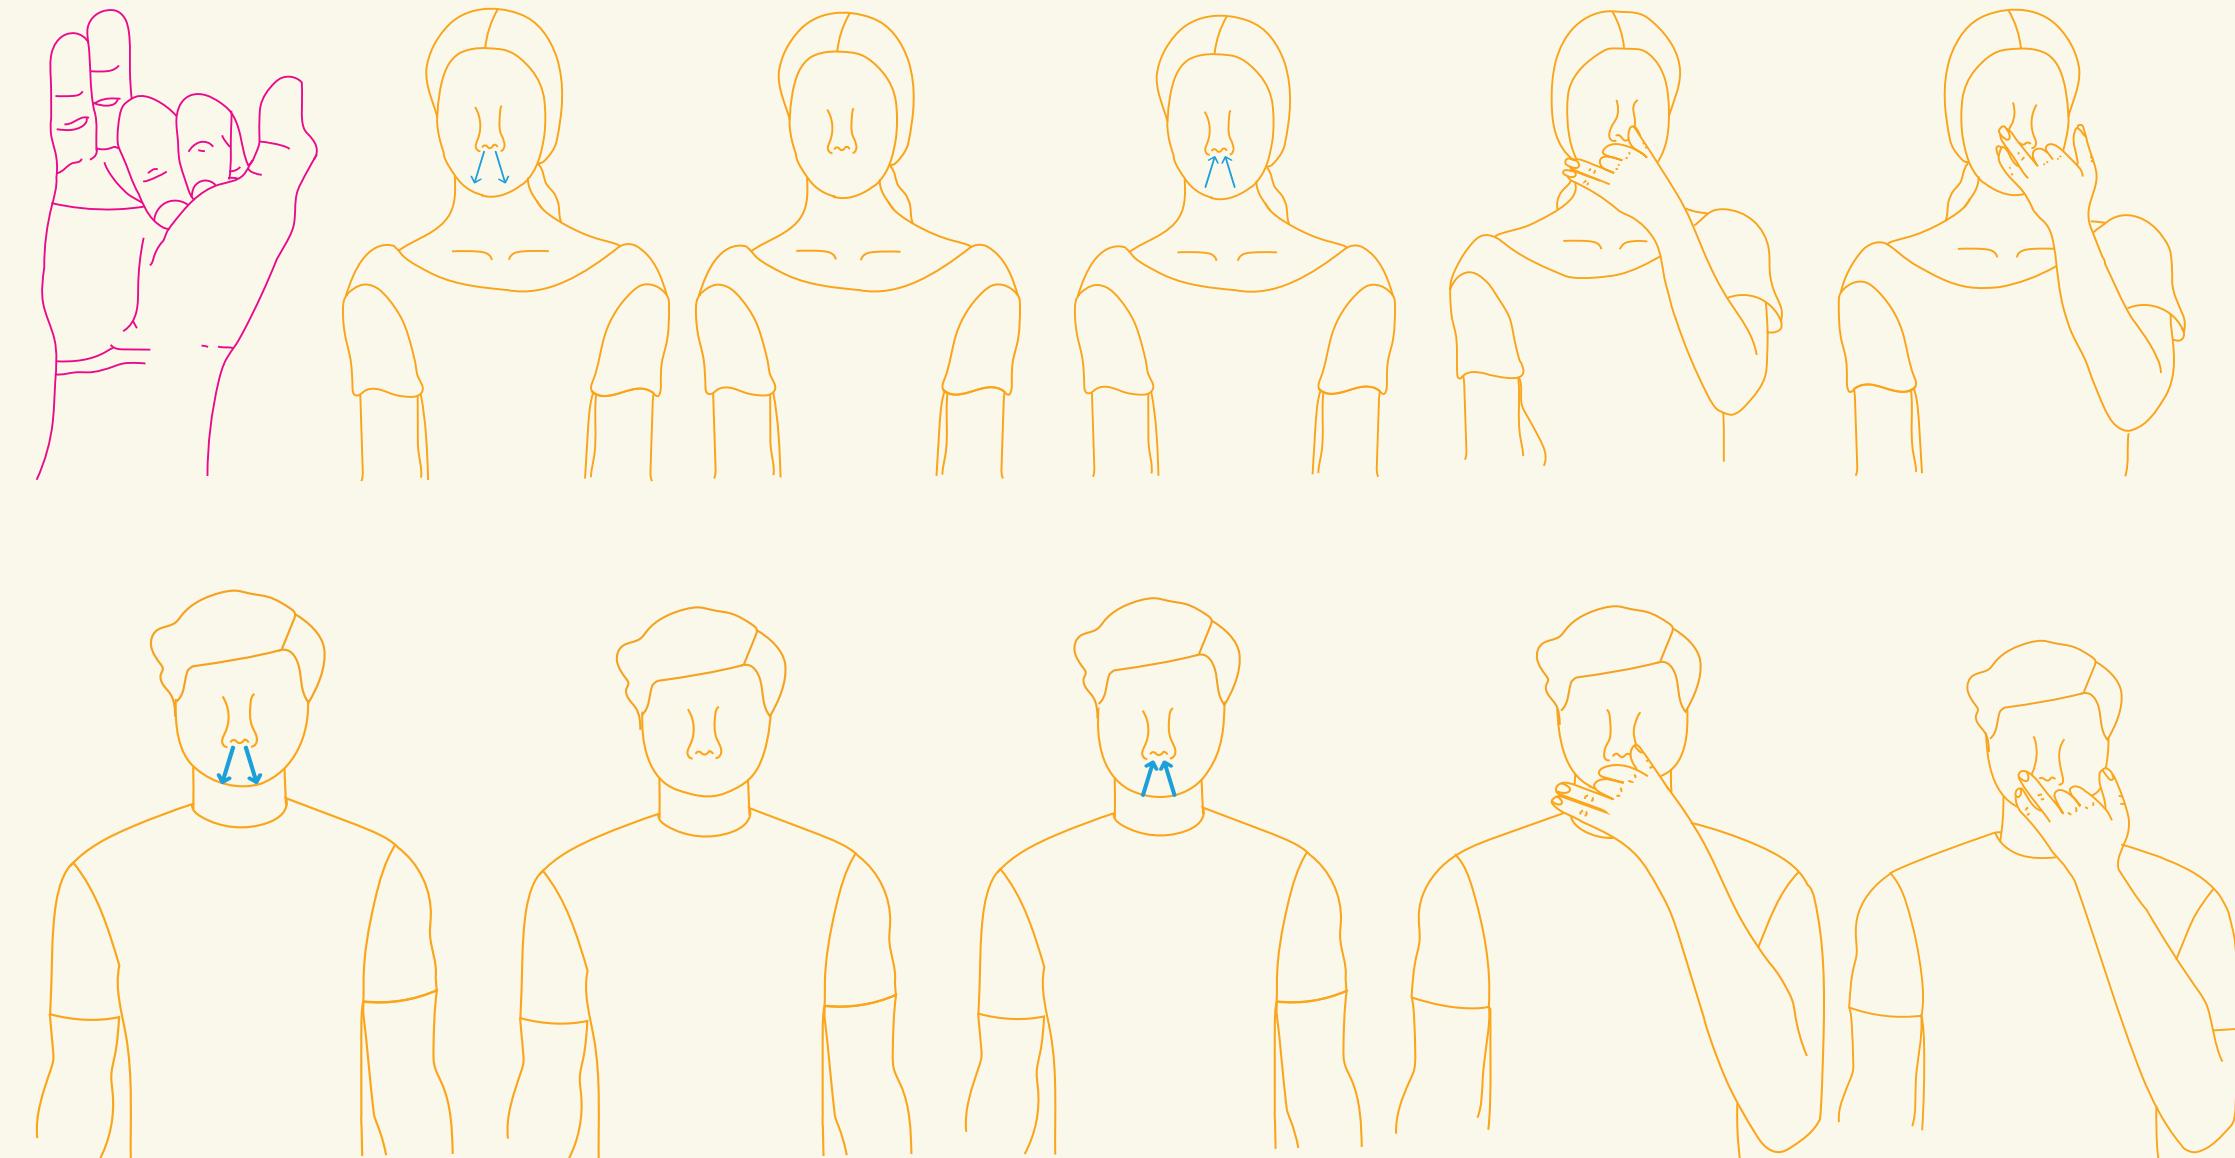

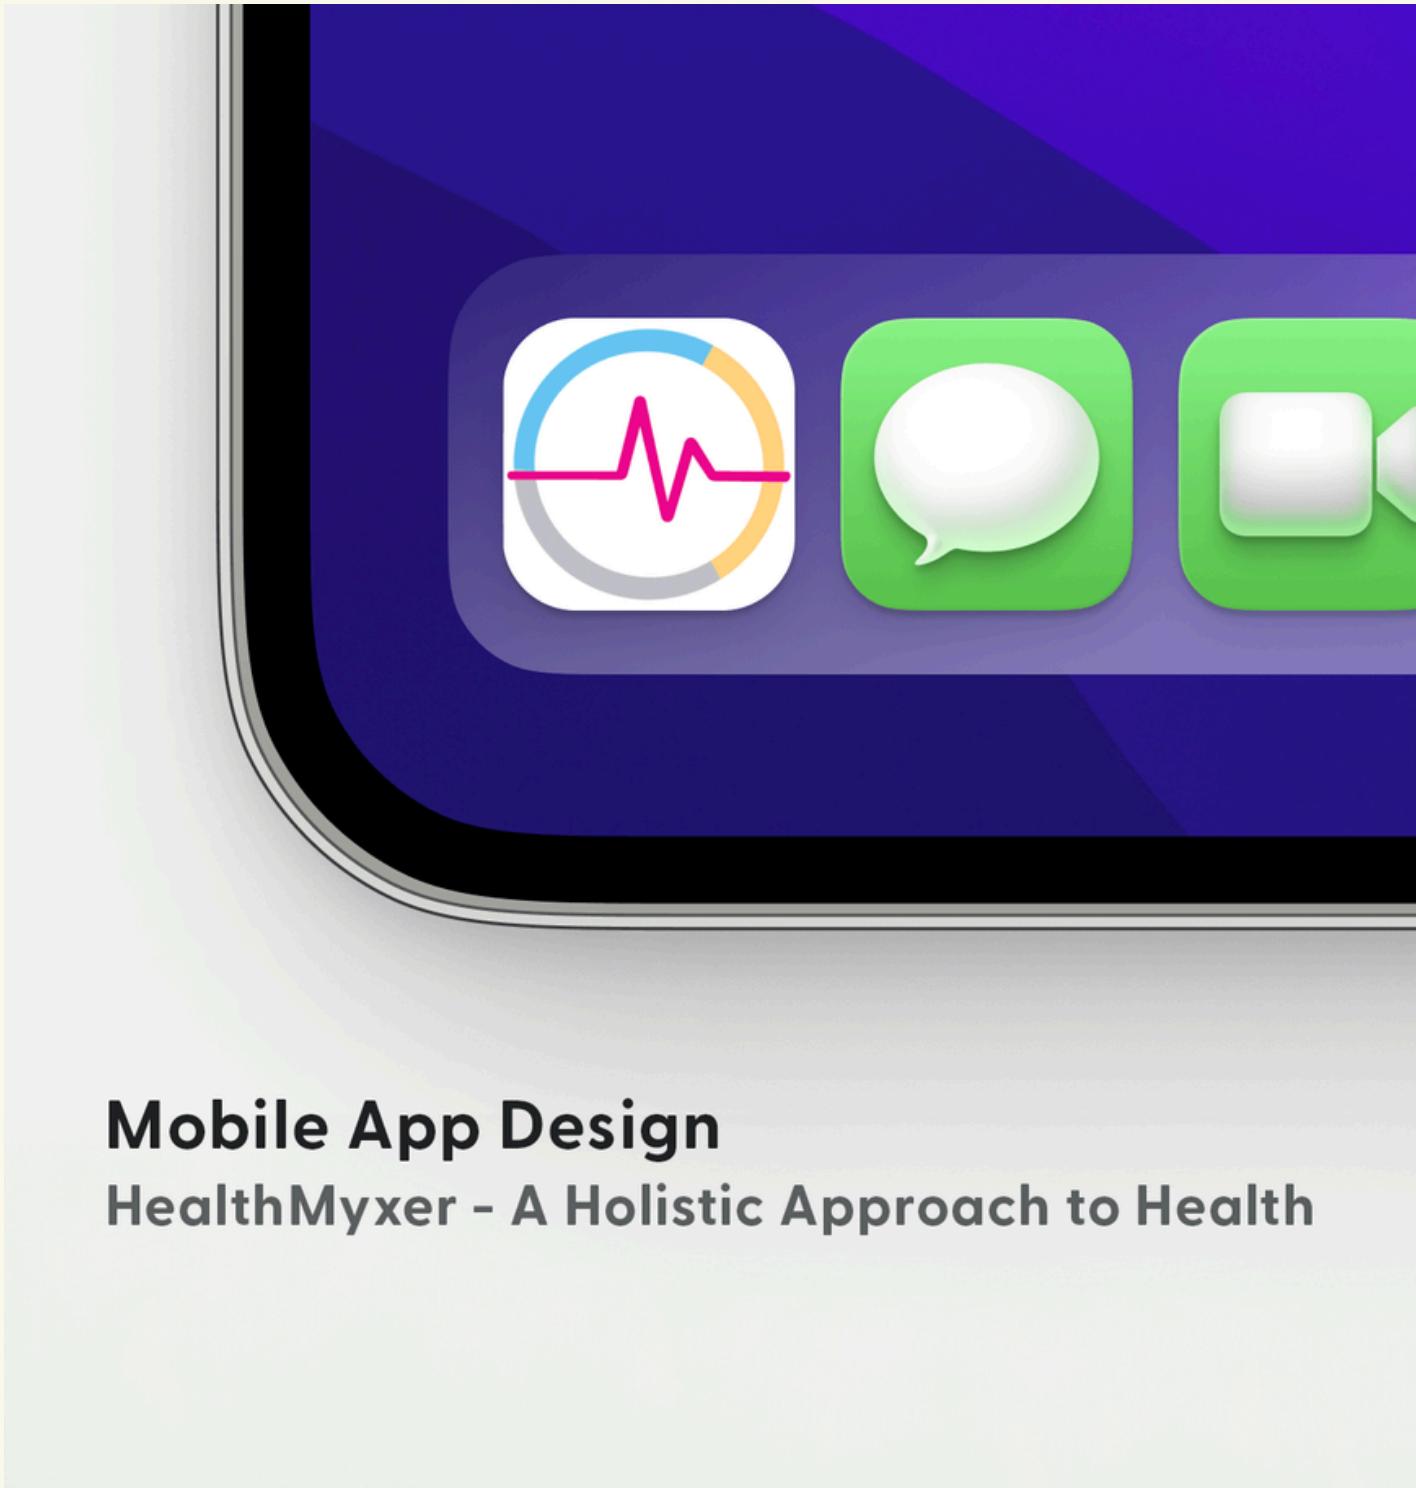

If the concept that positive thinking breeds positive outcomes, then the opposite is also true. Some psychologists believe that out of all of the thoughts we have in a day, 80% of them are negative, and 95% are the same as the day before. This vicious cycle of negative, repetitive thought and self-talk holds us back. Believing things like "I'm not smart enough" or "I don't have the right skills" is the self-talk that keeps most people stuck in jobs they hate, toxic relationships, and poor lifestyles. It also damages their mental health.
